EASYPACK HAND PACK SYSTEM

The Easypack™ Handpack System is an automated hand packing system. We created a system that integrates a case erector, handpack station, and automatic case sealer into a compact and cost effective case packing platform. The Easypack™ system presents both the case and product at the correct level for efficient ergonomic packing. The standard Easypack™ system is set up to run at 10 cases per minute, but is also available in other configurations for multiple operators.
